MEMORANDUM FOR: Chief, Policy and Plans Group

SUBJECT: Women Professionals

In connection with the DDA quarterly review, on the question of women professionals, I want to make sure that this is not merely a statistical report from the Director of Security, without any real meat to the story. In my view there should be the candid admission that we got into the game late, in 1974, but there has been a decade of progress, as there has been slow steady acceptance of the role of women in our professional ranks.

In telling this story I think it is important that there be some mention of the names and years that female professionals moved into a wide cross-section of key security positions. I'm less familiar with the PTAS arena, but the following "firsts" should definitely be included in any discussion of this issue, in terms of the modern era, since 1974:

I don't mean to short change any of the other key assignments, such as area security officers, [redacted]

STAT

As the bottom line, I would like to see at least one good slide on this topic, and I am sure that [redacted] can fill in the details, if we provide a simple basic outline. Possibly PMS can help out on gathering the data.
